

## ENGLISH

The English focus this half term is traditional stories. The children will investigate the structure of these and identify common themes. They will plan the key events in a story and explore characters' thoughts, feelings and actions. Using a familiar story theme, the children will plan and write their own stories. They will also listen to different folktales and practise joining in with retelling them. In small groups they will experiment with orally telling their own traditional stories.

## MATHEMATICS

The children will develop an understanding of place value by learning how to recognise the value of each digit in a three-digit number (hundreds, tens, ones). There will be a focus on counting in multiples of 50 and 100. Additionally, the relationship between multiplication and division will be explored. The children will learn the 3 times tables and consolidate their knowledge of the 2, 5 and 10 times tables and their associated division facts. They will apply this awareness to solve simple problems by deciding which of the four operations to use and why.

# GODWIN JUNIOR SCHOOL

## HISTORY

There was significant progress made in Britain from the Stone Age through to the Iron Age and Year 3 will investigate these changes by exploring differences in tools used, settlements (e.g. Iron Age hill forts), hunting and gathering, farming and culture. They will learn how to sequence key events on a timeline and will also look at technology, travel and religion.

## COMPUTING

The children will be using the Book Creator program to make their own simple book all about themselves. They will also include illustrations in their design and use trial and improvement to help solve problems that might arise.

## Y3 AUTUMN TERM FIRST HALF

# CURRICULUM NEWSLETTER

## SCIENCE

The science topic will be Rocks this half term. The children will compare and group together different kinds of rocks on the basis of their appearance and simple physical properties. They will also describe in simple terms how fossils are formed when things that have lived are trapped within rock.

## PE

In outdoor PE, the children will be learning the techniques of how to play football e.g. pass, dribble and shoot with control. They will also do multi-skills which is a non-specific sport that develops the children's movement and fitness levels. Indoors, they will plan collaboratively in pairs or small groups to choreograph and perform simple sequences in a dance routine.

## ART AND DESIGN

Linking to their History work, the children will research and design their own Stone Age Art. They will also experiment with light and shading when sketching different historical artefacts and compare the different styles used with the work of more modern artists.

## RE

To start the term, the children will learn about Judaism. They will gain an understanding of how Jewish people celebrate their beliefs at home and in the Synagogue. The children will also explore different Jewish festivals, such as Rosh Hashanah. In addition, they will learn about the importance of the Torah to Jewish people.
